La Trobe University, Bendigo

Department of Information Technology

INT21CN: Computer Networks

Subject Outline, Semester 1, 2002 (Version 3.0)

Content:

Topics expected to be covered in 2002 include:

- Overview of computer networks: layered models, functional description of the layers. The role of de jure and de facto standards.
- The transport service.
- Basic Internet application protocols: telnet, HTTP, SMTP, etc.
- Technical aspects of the Internet: IP, routers, DNS.
- Overview of network technology.
- Commercial telecommunications services and charging models.
- Network management, including SNMP and introduction to ASN.1. Network management software tools.
- Introduction to network security issues and firewalls.
- Introduction to encryption technologies and their application.
- Applications of computer networks in Electronic Commerce.

Contact time:

Normally 2 hours lectures per week, 2 hours tutorial per week. In 2002 the lectures will be held in a single 2-hour evening class. Graduate Diploma students (and some others, by special arrangement) will have a single weekly tutorial following the lecture. All other students will be expected to attend two daytime tutorials per week.

Lecturer:

Phil Scott, phone 5444 7277, email P.Scott@latrobe.edu.au, office: B1.10

Assessment:

There will be a single 3 hour exam at the end of the semester, which will count for 60% of the marks in this unit^[1]. Three (5%, 15% and 20%, due at the end of weeks 5, 9 and $13^{[2]}$) assignments will account for the remaining marks.

^[1] A subminimum of 40% of the possible exam mark (ie 24 out of 60) will apply to pass the subject

^[2] Provisional due dates, subject to change. Exact details will be communicated shortly.
